

OHSAS 18001:200 (Occupational Health & Safety Management Systems) Overview

This interactive and practical foundation course is designed to provide delegates with a basic knowledge of the main issues arising from implementing an Occupational Health and Safety Management System (OH&S MS), in order to:

- Understand the general requirements of OH&S systems, with specific reference to OHSAS 18001
- Understand the different approaches and benefits of implementing an OH&S management system
- Consider how OHSAS 18001 can be integrated into existing management systems

Course Objectives:

Our course will acquaint delegates with the requirements and principles of OHSAS 18001, providing delegates with an awareness of how an OH&S MS can be implemented and benefit the company's business performance.

Key Skills / Learning Objectives:

- Through the combination of interactive tutorials and workshops, our course will enable the delegates to:
 - Interpret the basic requirements and principles of OHSAS 18001: 2007 and how this applies to the most significant OH&S MS issues.
 - Assess the H&S hazards, risk assessments and risk controls.
 - Evaluate legislative compliance.
 - Initiate the process of implementing an OH&S MS within their company with an awareness of resources and skills required.
- Practical workshops are designed to reinforce the discussions and topics. This style of delivery makes the course both memorable and enjoyable for participants, ensuring long-term learning.

Course Outline:

Overview of OHSAS 18001 and the relevance of it to a business management system.

- Identifying resources, documentation needs and training
- Implementing an OH&S MS
- Gaining management commitment
- Risk assessments and evaluation of legislative compliance
- Key tools to achieve results and monitor improvements
- Integrating with existing systems
- Links to Corporate Governance
- Sources of information and further development

Who Should Attend?

- Those responsible for specific OH&S issues
- Those who provide strategic input into the OH&S management system, e.g. specialist contractors, OH&S Managers and Officers, design engineers, legal advisors and experts.
- Those who might be involved in the implementation or auditing of an OH&S MS.
